

Just Seal It!

As an original equipment manufacturer and replacement part supplier, Dana delivers innovative sealing technologies of the highest quality under the brand name Victor Reinz®.

Perhaps not currently well known in Australia and New Zealand, Victor Reinz® is the renowned gasket and sealing products supplier across the globe. Almost all of the top selling high-performance vehicles produced in the world continue to rely on Victor Reinz® gasket and sealing products technology for their engines and drivetrain.

All products in the comprehensive range meet the high standards of OEM quality. Ask your reseller for Victor Reinz® sealing products which are simple and easy to use. These sealants are also capable of withstanding a broad range of temperatures and are manufactured in the UK and Germany.

REINZOPLAST® - a solvent-free, permanently plastic, non-curing polyurethane sealer with very good flow properties. It creates ideal sealing conditions, especially in sealing joints subject to great static loads with vibrations, for micro-sealing finely-tuned components in engines, gearboxes or axles and sealing threads. REINZOPLAST® is an all-purpose application for use with all makes of engines and vehicles.

REINZOSIL® - a quick-hardening universal silicone sealer for use on two-dimensional connections with a sealing gap. The sealant boasts good resistance under load, even at high temperatures. Particularly intended for sealing surfaces in engines, gearboxes and axles, and also for cylinder liners and synthetic housings. This sealant is also very suitable for uneven and rough surfaces.

REINZOSIL-t® - the transparent version of REINZOSIL®. This silicone sealer is used both as a formed in place gasket for liquid application, as well as for sealing off cracks in parts. It can also be used for sealing car body parts, windscreens, light housings, glass components and for sealing and enclosing electrical connections.

RE-MOVE® - a highly effective sealant remover which can be used sparingly. RE-MOVE® makes short work of any kind of sealant, sealing residue and sealer, as well as adhesives, resin and paint residue. For removing gaskets, gasket remnants and sealing compounds and for removing glue, resin and paint residue.
