

STEERING SHAFT TECH BULLETIN

DATE: 21/05/2021

For 1000 Series

Dana steering shaft yoke, pinch bolt kit: 211271X

Important Note: The Dana Australia approved torque setting of that pinch bolt combination is **50-58Nm (37-43lbf/ft)**

Please use a calibrated torque wrench when tightening this fastener to make sure the above setting is achieved. Avoid the use of an impact gun.

Please **ignore** the torque recommendation on the yellow Dana-US tag attached to the kit, as that is not applicable for the Australian applications.

Do NOT reuse old bolt and nuts!

If you have any questions, please call Dana Australia on **1300 003 262** or e-mail aus.spicer@dana.com for more information.
